

## **Quant House Low Latency Market Data Solutions available through the Atrium Network Financial Community**

London, 17 January 2008 – Quant House, the provider of end-to-end systematic trading solutions today announced the selection of Atrium Network, a provider of smarter connectivity solutions for the global financial services community, to deliver its ultra low latency market data solutions to hedge funds.

Hedge funds, like all securities firm, demand technology to improve their performance. Their requirements range from low latency proximity hosting, smart order routing technology, connectivity to other industry firms, as well as fundamental internet, intranet and VOIP requirements. Atrium Network deploys fast, robust, secure, easy to install, scalable and price competitive technology enabling hedge funds to interconnect with other market infrastructure organisations (eg exchanges, clearing firms, CSDs and market data vendors). Atrium Network's clients can now access the main European and US equity and derivatives markets by leveraging Quant House's end-to-end low latency solutions including Direct Market Access, leading edge feed handler technology and a proprietary fibre optic network for Transatlantic data transport.

Commenting on the selection of Atrium Network, Founder of Quant House, Pierre Feligioni, said: "Firms using Atrium Network's technology can now have access to a wide range of low latency market data feeds. They are now able to significantly improve the performance of their intra-day quantitative trading strategies enabling them to trade ahead."

Emmanuel Carjat, CEO, Atrium Network added, "Fast and efficient access to market data is emerging as a key element of the overall investment process and is ever more essential to meet MiFID requirements. We are pleased to provide our access to Quant House via our global financial community network. Hedge Funds who are particularly latency sensitive will now be able to access one of the most innovative firms in the market".
